FUND MANAGEMENT

We remain intensively engaged on the Bridge Taxi Finance issue. The replacement of the servicing agent (from Mokoro to Mobalyz) has gone smoothly and early results on collections and sales appear promising.

The business rescue practitioner at Mokoro has come to the view that the business cannot be rescued. He has therefore started preparing an application to liquidate Mokoro. The liquidation hearing is likely to take place during the course of this month, depending on when the court is ready to hear the application. In the meantime, the bulk of the assets that were at Mokoro are now at Mobalyz and efforts to collect on the outstanding debts continue there.

Update: 17 September 2024

During September 2024, further progress was made on the fund's investments associated with Bridge Taxi Finance.

First, noteholders voted unanimously not to extend the maturity of the Martius note with JSE code MAR02B, scheduled to mature on 17th September 2024. Legally, this places the notes in default. The default crystallizes investors' claims against both the funding SPV and the previous service provider, Mokoro.

Second, we received partial coupon payments on both MAR02B and MAR03B on 17th September. While these are well below the originally promised payments, they are the first interest payments since January 2024.

Third, the default allows us, along with other noteholders, to begin restructuring the Martius and Redink notes.
