INVESTOR PROFILE

The fund's benchmark changed from STeFI Composite x 1.10 to STeFI Composite with effect from 1 February 2021, in keeping with international best practice. STeFI Composite x 1.10 remains the fund's target. The effects on the fund's performance of the ABIL Retention Fund held between 2014 and 2016 are included in the reported performance, as those effects have now dissipated to the point of being negligible.

OBJECTIVE

The objective of the portfolio is to provide a return in excess of Money Market portfolios, for investors seeking to earn a reasonable level of income with low risk of capital loss.

APPLICATION

This fund enjoys a flexible mandate, and the manager will scour opportunities within money market instruments, vanilla bonds, inflation-linked bonds and equities, including listed property. Where good value exists in suitable foreign assets, moderate use may be made of these. The basic premise is that higher returns than money market funds are available, but because the assets that generate these also incur higher risks, they will be used judiciously and cautiously.

Historically, the fund fact sheet (MDD) estimated the overall yield via a weighted average that combined nominal and real yields, as well as dividend yields on equities. A preferred methodology is to adjust real yields (on inflation-linked bonds) to estimated nominal yields by adding expected inflation. This preferred methodology is reflected in this month's MDD and a historical comparison is available on request.
